

PISES Riyadh

Virtual Learning through Microsoft Teams

At this unprecedented situation, PISES Riyadh is employing all means to continue providing quality education through online teaching. All classes from Nursery through A2 are being conducted on Microsoft Teams which is an excellent platform for unified communication and collaboration.

Such a sudden switch from regular teaching to an entirely new system of online teaching was not an easy task. We are grateful to the Almighty for enabling us to proceed with this demanding task and thank the School Management Council for all their support. We are also grateful to the entire IT department for their tireless efforts in making it a success.

Nevertheless, it's a huge transition. We are aware that the households were not ready for this; people aren't equipped with adequate devices for online learning of all children at home. We, at the same time, are facing multitudinous of challenges to let the system run. We appreciate all the cooperation from parents' side in this regard.

One reminder for our students is to strictly follow teachers' instructions to maintain the decorum of online classes. Any unauthorised change of login/password; deletion of any account or data; posting irrelevant or objectionable material in the class or any other forum; trying to access other students' accounts or their data; muting or removing other users during the class; performing any un-authorized activity in the system will lead to strict disciplinary actions against the end user. Once more, we believe, with your cooperation we will be through this quite successfully.

We thank you for all the cooperation and support.
